PATENT Docket No. 70325-040017

## AMENDMENTS TO THE CLAIMS

Please amend the claims with the following list of claims.

Claim 1 (currently amended): An electronic business transaction service method for conducting a business transaction over a computer network, comprising:

creating on a first computer an electronic business transaction document that is compatible with a business management software program, the electronic business transaction document being directed to plural recipient parties to a business transaction, the electronic business transaction document being directed to at least one recipient party in a computer communication format and to at least one other recipient party in a non-computer communication format;

transmitting the electronic business transaction document over the computer network to a network-connected transaction service server computer; and

sending the electronic business transaction document from the transaction service server computer to the <u>a first</u> recipient party parties using a computer communication format; and

sending the electronic business transaction document from the transaction service server computer to a second recipient party using a non-computer communication format in the computer and non computer communication formats.

Claim 2 (original): The method of claim 1 in which the non-computer communication format includes telephonic facsimile.

Claim 3 (original): The method of claim 1 further comprising transmitting a printed copy of the electronic business transaction document to a recipient party.

Claim 4 (currently amended): The method of claim 1 further comprising storing in an electronic address book associated with the business management software program address information for each party and a communication format indication for each party indicating the one of the computer and non-computer communication formats in which to transmit communications to the party.

PATENT Docket No. 70325-040017

Claim 5 (original): The method of claim 4 in which user selection of a party to receive an electronic business transaction document automatically associates with the party the communication format indicated in the communication format indication.

Claim 6 (original): The method of claim 1 further comprising charging a fee for each recipient party to which the electronic business transaction document is sent from the transaction service server.

Claim 7 (currently amended): The method of claim 1 in which the business management software program is capable of automatically populating and extracting information from the electronic business transaction document, the method further including transmitting a business management software component or access to it—the business management software component with the electronic business transaction document in the computer format to the at least one recipient party, if it is determined that the at least one recipient party is not capable of viewing the electronic business transaction document, the business management software component not being capable of automatically populating and extracting information from electronic business transaction documents.

Claim 8 (original): The method of claim 1 in which the electronic business transaction document includes a markup language computer file.

Claim 9 (original): The method of claim 8 in which the markup language computer file includes Extensible Markup Language.

Claim 10 (original): The method of claim 1 in which the business transaction relates to a construction project.

Claim 11 (currently amended): In a computer readable medium, an electronic business transaction document data structure, comprising:

a business transaction document form identifier for identifying a business transaction document form corresponding to an electronic business transaction document;

PATENT Docket No. 70325-040017

a recipient identifier for identifying each of plural recipients to whom the electronic business transaction document is directed; and

a communication format identifier for identifying a non-computer communication format for a first recipient party, and identifying a computer communication format for a second recipient party a communication format for each of the plural recipients.

Claim 12 (original): The medium of claim 11 in which the communication format identifiers for the plural recipients include computer and non-computer communication formats.

Claim 13 (original): The medium of claim 12 in which the non-computer communication formats include telephonic facsimile communication.

Claim 14 (currently amended): In computer readable media, electronic business transaction service software for conducting a business transaction over a computer network, comprising:

software for creating on a first computer an electronic business transaction document that is compatible with a business management software program, the electronic business transaction document being directed to plural recipient parties to a business transaction, the electronic business transaction document being directed to at least one recipient party in a computer communication format and to at least one other recipient party in a non-computer communication format;

software for transmitting the electronic business transaction document over the computer network to a network-connected transaction service server computer; and

software for sending the electronic business transaction document from the transaction service server computer to a first recipient party using the recipient parties in the computer communication format-and non computer communication formats; and

software for sending the electronic business transaction document from the transaction service server computer to a second recipient party using a non-computer communication format.

Claim 15 (original): The media of claim 14 further software for storing in an electronic address book associated with the business management software program address information for each

PATENT Docket No. 70325-040017

party and a communication format indication for each party indicating the one of the computer and non-computer communication formats in which to transmit communications to the party.

Claim 16 (original): The media of claim 15 in which user selection of a party to receive an electronic business transaction document automatically associates with the party the communication format indicated in the communication format indication.

Claim 17 (original): The media of claim 14 further comprising software for charging a fee for each recipient party to which the electronic business transaction document is sent from the transaction service server.

Claim 18 (original): The media of claim 14 in which the business transaction relates to a construction project.

Claim 19 (currently amended): An electronic business transaction service method for conducting a business transaction over a computer network, comprising:

creating on a first computer an electronic business transaction document that is compatible with a business management software program, the electronic business transaction document being directed in one or more communication formats to plural recipient parties to a business transaction;

transmitting the electronic business transaction document over the computer network to a network-connected transaction service server computer; and

sending the electronic business transaction document from the transaction service server computer to the a first recipient party parties using a computer communication format; and

sending the electronic business transaction document from the transaction service server computer to a second recipient party using a non-computer communication format, in the one or more communication formats.

Claim 20 (original): The method of claim 19 in which one of the communication formats includes telephonic facsimile.
